

# *European Mass Spectrometry* Web Agreement

An electronic edition of *European Mass Spectrometry (EMS)* is available on the IM Publications web site ([www.impub.co.uk](http://www.impub.co.uk)). Initially we are restricting access by domain name or IP address to users on your site. We hope to offer access by password as well, but this is not available at present. Please contact us if you would like to be kept informed of developments with this.

Your subscription entitles you to access for all users on a single site: university campus, company site or branch. We do not require at the moment any lengthy agreement or license to be signed by subscribers, but we will monitor developments with generic site licensing schemes and may implement such a scheme in the future. Access will only be set up once payment has been received (new subscriptions) and this form has been completed and returned to us.

Our only requirement is that you inform your users of the following and that you undertake to make your best efforts to see that they comply.

The electronic files provided for the web edition of *European Mass Spectrometry* are copyrighted and should not be passed in any form electronic paper fax or other to any person outside your site. This means that you must not pass any such material to people on other campuses of a university or other branches or sites of companies. Please respect copyright and help us to continue to maintain low subscription rates.
